

An exhibition full of surprises, not only in subject matter, but also in the use of materials like gold leafed hair, mysterious hovering particles in colorful fluid and bandages on symbolic limbs. Portraying materialized conversations between bodies, memories of abandoned objects, animal-like images on skin, the exhibition features photography, video and installation with fresh conceptual approaches. All artworks speak a similar sensitive language of empathy for situations of depth. The viewer leaves the exhibition touched in a subtle way. This show includes work from five artists currently working and residing in Nashville, two of them recent alumni of Watkins College of Art, Design & Film.
